

## Adult Sewing

Student should arrive at first class with at least ½ meter of fabric for tote bag outer shell (no vinyl please) and ½ meter of lining fabric and one spool of matching thread or thread to use on this project. Fabricland has a good selection of Home Deco fabrics at \$5.00 a meter and would make a great choice for the outer shell.

Handles will be provided with the class costs in a beige 1-inch wide webbing and some other colors may be available depending on the class flow. Should you wish to purchase webbing for the handles, your choice cotton or polyester 1 inch wide webbing and the length required remembering that for an over the shoulder bag you will required at least 1.3 meters and for a simple shopping bag .8 meters and over the shoulder style up to a 1.5 meters.

A couple of buttons but this is optional for a top closure

\*\*\*

Sewing kits are available for use in the classroom, but should you wish to carry on sewing investing in a small sewing kit would be required

\*\*\*

The second project will be a simple garment like PJ pants, tunic top or maybe a wrap style house coat and if they are new sewers no fleece please as the extra handling is hard for first time sewers, for this you will require the pattern, fabric and notions as noted on the pattern with approximate fabric, no buttons or zippers on this first item,

If you be a returning sewer they can check out the other patterns that are on the You Can Make It list of possible projects in level one and level two and for more advanced sewers they can check out the next two levels for suggested projects and if in doubt please speak with Heather during the class for suggestions and requirements to build your skill.
