

If the student is new they will make a tote bag as their first project and will need to bring 1/2 meter of outer fabric, 1/2 meter of lining fabric (quilting cottons work well for both, and home decor fabric for the outer bag makes a super tote bag) and matching thread.

Handles will be provided with the class costs in a beige 1-inch wide webbing and some other colors may be available depending on the class flow. Should you wish to purchase webbing for the handles, your choice cotton or polyester 1 inch wide webbing and the length required remembering that for an over the shoulder bag you will required at least 1.3 meters and for a simple shopping bag .8 meters and over the shoulder style up to a 1.5 meters. A couple of buttons but this is optional for a top closure

Sewing kits are available for use in the classroom, but should your child wish to carry on sewing investing in a small sewing kit would be required

The second project will be a simple garment like PJ pants, and if they are new sewers no fleece please as the extra handling is hard for first time sewers, for this they will require the pattern, fabric and notions as noted on the pattern with approximate fabric, no buttons or zippers on this first item,

If your child is a returning sewer they can check out the other patterns that are on the You Can Make It list of possible projects in level one and level two and for more advanced sewers they can check out the next two levels for suggested projects and if in doubt please speak with Heather when dropping off or picking up your child these lists can be emailed to you just require at time of registration and the office will send you the listing.
